

PROFESSIONAL SUMMARY

Results-driven developer skilled in Python, Data Structures & Algorithms, and Machine Learning, with hands-on experience building an IoT anomaly detection system using autoencoders and graph analytics, along with developing React-based applications and working with real-world datasets to deliver practical, data-driven solutions.

KEY EXPERTISE

Python, Data Structures & Algorithms, Machine Learning, IoT Anomaly Detection, React, GitHub, Problem Solving

EDUCATION

Sreenidhi University

2024 - 2028

B.Tech. - Artificial Intelligence and Machine Learning | CGPA: 7.61 / 10

Narayana junior college, Hyderabad

2024

12th | TSBIE | Percentage: 78 / 100

Narayana e-techno school, Hyderabad

2022

10th | CGPA: 8.80 / 10

PROFESSIONAL EXPERIENCE

Deloitte | Consultancy | Data Analytics

16 Oct, 2025 - 16 Oct, 2025

Data Analytics Job Simulation

Key Skills:

Data Analysis | Data Cleaning | Data Visualization | Excel / Spreadsheet Analysis | Problem Solving | Analytical Thinking

Completed a Data Analytics Job Simulation with Deloitte, gaining hands-on experience in data cleaning, analysis, and visualization. Worked with raw datasets to identify inconsistencies, transform data, and extract meaningful insights. Applied analytical thinking to interpret trends and detect anomalies, including basic forensic data analysis tasks. Developed problem-solving skills by addressing business scenarios using data-driven approaches. Presented findings through clear visualizations and summaries to support decision-making. This experience strengthened my ability to work with data, think critically, and communicate insights effectively in a consulting environment.

INTERNSHIPS

Deloitte | Consultancy

16 Oct, 2025 - 16 Oct, 2025

PROJECTS

IoT Anomaly Detection using Autoencoders and Graph Analytics

21 Jan, 2026 - 10 Mar, 2026

Team Size: 4

Key Skills:

Python Basic scripting, data handling

Data Analysis

Deep Learning

Graph Analytics

Data Visualization

Anomaly Detection

Project Link: <https://iot-anom-dash-tyodlo7w.manus.space/>

IoT anomaly detection project uses Python, data analysis, autoencoders, and graph analytics to identify abnormal device behavior. It involves preprocessing IoT data, training deep learning models, analyzing network relationships, and classifying anomalies into normal, early, and critical faults for improved system reliability and security.

CO-CURRICULAR ACTIVITIES

- o volunteer

PERSONAL INTERESTS / HOBBIES

- o reading mangas,football,story type games

WEB LINKS

- o Github - <https://github.com/battinisadwik>
- o Codechef - https://www.codechef.com/users/for_beam_15

PERSONAL DETAILS

Gender: Male

Marital Status: Single

Current Address: East Marredpally, Archana Apartment, flat no.107, near HP petrol pump, Hyderabad, Telangana, India - 500026

Emails: 24011cseai0010@aiml.suh.edu.in , battinisadwik208@gmail.com

Date of Birth: 17 Jun, 2007

Known Languages: malayalam,japanese

Phone Numbers: +91-7671971756, +91-7671971756
