

CHAKRAVARTHULA RAGHAVA

B.Tech. - Computer Science & Engineering

Ph: +91-8977238775

Email: 2401100cse0067@cse.suh.edu.in

Nalgonda, Telangana, India - 508001

EDUCATION

Sreenidhi University B.Tech. - Computer Science & Engineering CGPA: 9.43 / 10	2024 - 2028
Pragathi Jr College 12 th TSBIE Percentage: 95.90 / 100	2023
Akshara High School 10 th CGPA: 10 / 10	2021

PROJECTS

Cultra - Smart Event Management System

Team Size: 4

Key Skills: React Native, Node JS, Express JS, Mysql.

Project Link: https://github.com/raghavach007/Smart-Event-Management-System_updated.git

Built a full-stack campus event management platform using React Native, Node JS, Express JS and MySql enabling role-based access for students, organisers, and admins. Implemented event approval workflow and QR-based ticketing for secure entry verification. Optimised event discovery and registration, reducing manual coordination.

Hospital OS

Team Size: 4

Key Skills: Spring Boot REST JDBC MySQL

Project Link: <https://github.com/raghavach007/Unified-Hospital-management-system.git>

Built a backend-driven hospital management system using Node js, Express js, and MySQL, implementing a modular architecture with controllers, middleware, and role-based routing. Designed role-based access control for admins, doctors, and patients using authentication middleware, ensuring secure access to sensitive medical data. Developed RESTful APIs for appointment scheduling, patient record management, and administrative operations, improving workflow efficiency and reducing manual coordination. Structured the application with separate route handlers (admin, organizer/doctor, student/patient) and centralized database configuration for scalability and maintainability.

ASSESSMENTS / CERTIFICATIONS

Java programming fundamentals

Provider: Infosys springboard

SEMINARS / TRAININGS / WORKSHOPS

Drone technologies Institute Name: Sreenidhi University

15 Sep, 2025 - 19 Sep, 2025

Key Skills:

Drone Operations: Flight Planning, Manual & Autonomous Piloting, Pre-flight Inspections.

UAV engineering (hardware assembly, sensor integration) Airspace regulations, risk assessment

During this 5-day intensive bootcamp, I got hands-on experience in UAV engineering and flight operations, starting from assembling a multirotor drone to executing real flight missions. I worked with flight controllers like Pixhawk/APM, ESCs, and GPS modules, and learned how to configure and calibrate them using Mission Planner and QGroundControl.

The training included both manual flying and autonomous waypoint navigation, along with practical exposure to applications like 3D mapping and photogrammetry. I also learned the basics of DGCA regulations, airspace safety rules, and pre-flight risk checks required for safe and professional drone operations.
