BRIEF SUMMARY

A motivated and detail-oriented student seeking an opportunity to utilize my technical knowledge, teamwork, and problem-solving skills in a dynamic organization while continuously learning and growing professionally.

KEY EXPERTISE

Python Programming, Web Development SQL

EDUCATION

Sreenidhi University

2024 - 2028

B.Tech. - Computer Science & Engineering | CGPA: 8.57 / 10

Narayana Junior College, Hyderabad

2024

12th | TSBIE | Percentage: 95.60 / 100

Kodad High School, Kodad

2022

10th | BSET | CGPA: 9.70 / 10

INTERNSHIPS

ZPHS | Academics / Research

07 Jul, 2025 - 25 Jul, 2025

Social Internship

Key Skills: Problem Solving Communication Skills Collaboration Teamwork Leadership

This Social Internship Program was undertaken at Zilla Parishad High School (ZPHS), Ganapavaram, with the primary objective of supporting the implementation of the Mid-Day Meal Scheme. The program aimed to provide nutritious meals to students from economically weaker backgrounds sections, encouraging regular school attendance and improving their overall health and learning outcomes.

As an intern, my role involved assisting in the smooth preparation and distribution of meals, ensuring hygiene standards were maintained, and coordinating with school staff to manage the students during meal times. Through this practical engagement, I was able to observe the functioning of a vital government welfare initiative at the grassroots level, and understand the challenges faced in its execution.

This internship experience contributed directly to the Sustainable Development Goals — SDG 2: Zero Hunger and SDG 4: Quality Education — by addressing classroom hunger and supporting inclusive education. The insights and skills gained through this program have strengthened my sense of social responsibility and motivated me to contribute further towards community development in the future.

PROJECTS

Online Train Reservation System

15 Dec, 2025 - 17 Jan, 2026

Mentor: Ms.K.Srividya | Team Size: 3

Key Skills: Java JDBC Servlets JSP MVC SQL HTML CSS

Project Link: https://drive.google.com/file/d/1y0dYzB3kKHWnL30AXjsAZb9l4t4jJFM7/view?usp=drive_link

The Online Train Reservation System is a web-based application designed to simplify and digitalize the train ticket booking process. It provides users with an easy-to-use interface to register, log in, search for trains, check availability, and book tickets securely. By replacing manual ticketing methods, this system reduces human errors, minimizes waiting time, and provides a faster, more reliable booking experience.

This project uses core Java, JDBC, MySQL, Servlets, JSP, and basic web technologies to build a dynamic and interactive platform. It also includes database connectivity for storing user details, train information, booking records, and login credentials. The system follows the MVC pattern to ensure clean separation between presentation, logic, and data layers, making the application more scalable and easier to maintain.

Additionally, the system supports essential features such as user authentication, secure data storage, and booking confirmation. It ensures that users can access the platform anytime with a smooth and efficient workflow. The application is designed to provide a real-life simulation of an actual railway reservation system at a smaller scale.

Overall, this project showcases the practical use of Java, SQL, and web development concepts while delivering a functional and user-friendly reservation platform. It serves as a strong foundation for future upgrades such as payment integration, mobile app support, and real-time train updates.

ACHIEVEMENTS

- Selected for District Level Kabaddi in Under 17 Category

Climate Change

Key Skills:

- Technical Analysis
- Impact Assessment
- Evidence Interpretation
- Mitigation
- Adaptation Strategy Evaluation
- Climate Policy Literacy

1. Climate Science Understanding

You learn the scientific foundations of climate change — greenhouse gases, global warming, carbon cycles, and climate systems. This helps you understand why climate change happens and how human activities influence it.

2. Data Analysis & Evidence-Based Thinking

The programme teaches you how to:

Interpret climate data and reports.

Understand research findings

Analyze trends and projections.s

This builds strong analytical and critical thinking skills.

3. Climate Policy & Governance Knowledge

You gain knowledge about:

International agreements like the Paris Agreement

India's climate policies

Global climate negotiations

This helps you understand how governments and institutions respond to climate challenges.

4. Mitigation & Adaptation Strategies

You learn about:

Renewable energy solutions

Carbon reduction strategies

Climate adaptation methods

This skill is useful for sustainability roles and environmental planning.

5. Systems Thinking

Climate change is not only an environmental issue — it affects economics, society, health, and business. The programme helps you connect these areas and think holistically.

6. Communication & Awareness Skills

You develop the ability to:

Communicate climate issues clearly.

Present policy insights

Explain complex topics in simple language.e

This is useful for public policy, NGOs, corporate sustainability, and research fields.

EXTRA CURRICULAR ACTIVITIES

- Kabaddi Cricket

PERSONAL INTERESTS / HOBBIES

- Knowing About New mobiles, Laptops. Special Intrest on Bikes and cars. Listening to the Music

WEB LINKS / IMs
