B.Tech. - Computer Science & Engineering

Ph: +91-9849499584

Email: 2401100cse0040@cse.suh.edu.in

Hyderabad, Telangana, India - 500001

PROFESSIONAL SUMMARY

I am a motivated second-year engineering student with an interest in technology, web development, and problem solving. I have basic knowledge of programming languages like Python and experience in creating web pages using React. I enjoy learning new technologies and working on innovative projects such as a web-based soil analyzer. I aim to continuously improve my technical and teamwork skills while contributing positively to the organization.

EDUCATION

Sreenidhi University

2024 - 2028

B.Tech. - Computer Science & Engineering | CGPA: 7.98 / 10

Narayana college, Hyderabad

2024

12th | CGPA: 8.40 / 10

The mother's integral High school

2022

10th | CGPA: 8.70 / 10

INTERSHIPS

zphs High school | Education

07 May, 2026 - 27 May, 2026

social intern

During my college holiday internship, I participated in a community outreach program where we visited a government school to interact with and teach students. Our main goal was to make learning enjoyable and engaging for them. We used fun and creative teaching methods such as games, activities, and interactive discussions to help the students understand concepts more easily. This experience not only helped the children learn in an interesting way but also allowed us to develop our communication, teamwork, and teaching skills while contributing positively to the community.

PROJECTS

The web-based soil analyzer (currently working)

Team Size: 4

Our project is a Web-Based Soil Analyzer, a simple web application designed to help farmers understand their soil condition and choose suitable crops. Farmers can enter basic soil information such as soil color, moisture level, pH value, and previous crop type through a user-friendly website. Based on these inputs, the system analyzes the soil and provides recommendations like suitable crops, fertilizer suggestions, pest prevention tips, and weather updates. The application also includes a crop tracker feature to monitor crop growth. It is developed using HTML, CSS, and JavaScript for the frontend, Python with Flask for the backend, Firebase for the database, and Figma for designing the interface.

wander move

Team Size: 6

Project Link: https://docs.google.com/presentation/d/1Kd71AWuYOiQvnbj8RktO_pg-asEqr-OQ/edit?

WanderMove is a smart and secure travel platform developed for Smart India Hackathon 2025. It offers AI-powered trip planning, verified local guide booking, real-time travel updates, safety alerts, live tracking, and TripSync for safer solo travel. By supporting local businesses and promoting sustainable tourism, WanderMove creates a connected, community-driven travel ecosystem for India.

Lost & Found

Lost & Found Item Management System: Developed a web-based platform for managing lost and found items within a college campus. The system allows users to report found items along with their location details, while owners can search and claim their belongings through a secure OTP-based verification process. Claims are validated by the security office using basic ownership questions and OTP authentication, ensuring safe and efficient item recovery.

PERSONAL DETAILS

Gender: Female

Date of Birth: 16 Apr, 2007

Current Address: 2-3-647/B/92 New Prem nagar Amberpet

Known Languages: Telugu, Hindi, English

Hyderabad, Hyderabad, Telangana, India - 500001

Phone Number: +91-9849499584

Emails: 2401100cse0040@cse.suh.edu.in, pullabhuvanakruthi@gmail.com
