PROJECTS

Automatic language translation using achie learning Mentor: Venkat Ramana mam Team Size: 4 Key Skills: python, Machine learning,Natural Learning process,Data processing,UI design This project involves developing a Language Translation Application that translates text from one language to another using Natural Language Processing and machine learning techniques. The application provides a simple user interface where users can enter text and select the target language to receive accurate translations. My role in the team was to assist in designing the user interface, integrating the translation API, and testing the application to ensure correct translations. The outcome of this project is a functional multilingual translation app that helps users easily understand and communicate in different languages, improving accessibility and cross-language communication.
